Subject: CO Alternatives Analysis Presentation
Attachments: Final CO DSV Presentation for WEFTEC.pdf

Hi John and Greg,

At yesterday's meeting on Tetra Tech's work on the R8 Lagoons project, Manjali committed to sending you all a presentation from CO where they discussed their alternatives analysis process for WQS variances. I've attached CO's presentation that they gave at WEFTEC this past fall, which is a more updated version of the presentation from the ACWA Variance Workshop that Manjali mentioned yesterday. Please do not distribute the presentation.

Thanks,
Melissa
